## LANGUAGES

- Arabic (Native)
- English

## HARD SKILLS

- Analog and digital Physical design
- VLSI Design
- Flutter & Android Development
- Object-Oriented Programming
- Artificial Intelligence & Machine Learning
- Linux CLI
- Scripting Languages
- HDLs

## SOFT SKILLS

- Teamwork and Collaboration
- Communication Skills
- Leadership and Initiative
- Time management
- Proficient in Word, Excel, and PowerPoint

## PROGRAMMING LANGUAGES

- JAVA(Advanced)
- C (Advanced)
- Python (Advanced)
- Verilog (Advanced)
- MySQL
- HTML & CSS
- JavaScript

## SUMMARY

Graduated from Birzeit University (February 2025) with a strong foundation in AI, machine learning, and VLSI design. Proficient in Verilog, Python, and TCL scripting, with hands-on experience using EDA tools like Synopsys Design Compiler and ICC2. Skilled in software development and various programming languages. Passionate about leveraging technical expertise in real-world applications, excelling in dynamic environments that foster innovation. Good problem-solving, communication, and teamwork abilities, with a commitment to continuous learning and professional growth. Eager to contribute to cutting-edge projects and make a meaningful impact in the industry.

## WORK EXPERIENCE AND PROJECTS

### Analog and Digital Physical Design Trainee

- Completed a six-week intensive training program (250 hours) at Orion VLSI Technologies company.
- Trained in physical design concepts, including metal and vias types, CMOS Basics, Floorplanning, Power Planning, placement, Routing, Time Closure, DRC (Design Rule Check), and LVS (Layout Versus Schematic).
- Gained hands-on experience with tools such as Microwind and Synopsys to apply the steps of physical design in sequence.
- Acquired foundational knowledge of the TCL (Tool Command Language).

### Deyar company for Development and Investment

- Deyar for Development and Investment is a leading company specializing in the import of stationery and educational materials.
- 2 years of work experience in communication and collaboration with ministries and large companies.
- Developed skills in customer service, order preparation, and invoice writing.

### Implementation of 8080 CPU in ICC2

- Conducted a comprehensive study on integrating the Intel 8080 microprocessor into the ICC2 platform, optimizing legacy processor performance for modern applications.
- Performed detailed power analysis, performance evaluation, and system architecture modifications to enhance the functionality and capabilities of the 8080 CPU within the ICC2 environment.
- Explored potential applications of the 8080-ICC2 combination for Internet of Things (IoT) devices, including verification, validation, and testing to ensure reliability and efficiency in practical implementations.

### Flutter Mobile Application for Diabetes Management with prediction model

- Diabetes Risk Prediction Model: Developed a machine learning model integrated into a Flutter app to predict the risk of diabetes in users based on their health data.
- Comprehensive Diabetes Management: Implemented features to help patients manage their condition, including tracking blood sugar levels, medication reminders, insulin dose calculator, diet recommendations, Providing analysis and reports, and a secure in-app chat for real-time communication with healthcare providers, ensuring continuous support and monitoring.

## EDUCATION

- **Birzeit University Bachelor of Computer Engineering.**

Birzeit-Ramallah (September 2020 — February 2025)

- **Udacity Front-end program.**

Online (July 2024 – September 2024)

- **Tawjihi High school graduation King Ghazi secondary school.**

Biddu- Jerusalem (2019-2020)

- **Amideast Access 13 program.**

Ramallah (2017 - 2019)

## CERTIFICATES

- ❑ **Tawjihi High school-GPA: 92.7**
- ❑ **Amideast-Access 13**
- ❑ **Microsoft Learn Student Ambassador Certificate (Git & GitHub)**
- ❑ **Analog and digital physical design internship**
- ❑ **Udacity Front-end web developer**
