SUMMARY

Computer Engineering graduate from Birzeit University with hands-on experience in full-stack development, mobile app development, and artificial intelligence. Proficient in Python, Java, Verilog, and Linux scripting, with a strong foundation in computer networks, object-oriented programming, data structures, and machine learning. Eager to contribute to innovative teams and real-world solutions. Fluent in Arabic and English.

Experience & Projects

Full Stack Development Intern – iConnect Technologies, Ramallah

- Completed 150 hours of hands-on training.
- Worked on backend (ASP.NET) and frontend (Angular) development.
- Developed and optimized web applications, contributing to both server-side and client-side development.

Flutter Mobile Application for Diabetes Management with prediction model

- Diabetes Risk Prediction Model: Developed several machine learning models after data preprocessing and Feature extraction techniques, then integrated the best model into Flutter app to predict the risk of diabetes for users based on their health data.
- Comprehensive Diabetes Management: Implemented features to help patients manage their condition, including tracking blood sugar levels, medication reminders, insulin dose calculator, diet recommendations, providing analysis and reports, and a secure in-app chat for real-time communication with healthcare providers, ensuring continuous support and monitoring.

Coffee Shop Management System – Java & MySQL

- Built using Java & MySQL with SceneBuilder UI.
- Applied OOP principles and database design (ERD, schemas).

Super Market Product Shelving Simulation (C)

- Simulated multi-threaded and multi-process behavior for stocking shelves.
- Emphasized synchronization, shared memory, and IPC.

Design and Modeling of a Human Resource Management System (HRMS)

- Designed a complete HRMS including system features, user/system requirements, and non-functional requirements.
- Developed UML diagrams: use case, class, activity, and sequence to model system behavior and structure.
- Applied software engineering principles for system analysis and design, focusing on scalability and usability.

Education

- **Birzeit University -** B.Sc. in Computer Engineering (September 2020 — February 2025)

  GPA: 83.6 | Listed on the Honor List twice.
- **King Ghazi Secondary School -** Tawjihi (Scientific Stream) (2019 - 2020)

  GPA: 93.3 | Scientific Stream
- **Amideast -** English Access Microscholarship Program – Access 12 (2016 - 2018)

Certificates

- Microsoft Learn Student Ambassador Certificate (Git & GitHub)
- IEEE Arduino Certificate
- Tawjihi High school
- Amideast-Access 12

Technical Skills

- **Languages**: Python, Java, C, C#, Verilog, Dart, HTML/CSS, Shell Script
- **Frameworks & Tools**: Flutter, ASP.NET, Flask, Git
- **Core Skills**: OOP, Linux Scripting, REST APIs, UML Design
- Actively learning ReactJS to enhance front-end skills
- Mobile application Development
- Artificial Intelligence
- Machine and Deep Learning

Soft Skills & Interests

- Teamwork and Collaboration
- Problem Solving
- Communication Skills
- Time management
- Proficient in Word, Excel, and PowerPoint
- Strong Sales and Customer Service Skills
